Specification

The disclosure is objected to because of the following informalities:

“canuse” (paragraph [0005], line 16) should be changed to --can use--.

“two optical viewfinders” (entire specification) should be changed to --optical viewfinder--.

“second digital camera 22” (entire specification) should be changed to --digital camera 22--.

Appropriate correction is required.

Claim Objections

Claim 9 is objected to because of the following informalities: claim 9 as presented was un-numbered. Claim 9 has been numbered. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claimed “two optical viewfinders” renders the claims indefinite. Applicant’s invention has a single viewfinder that has two lenses. Note that the specification also must be amended to correct for this error.

The claimed “further comprising a fourth lens set installed on the sliding set” and “the fourth lens set slides to a position between the two optical viewfinders” renders the claims indefinite. The so-called “fourth lens set” is the (single) optical viewfinder.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2 and 7-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Correa et al.

Chassis member 26 meets the claimed "housing." Laser diode 212 meets the claimed "laser source." Lens 214 meets the claimed "first lens set." Moving mirror 122 meets the claimed "reflector." Lens 118 meets the claimed "second lens set." Diffractive optical element 202 meets the claimed "framing mask." Lens 116 meets the claimed "third lens set." Objective lens assembly 22 meets the claimed "camera lens."

Allowable Subject Matter

Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
